

Dear IIBEC Member,

On behalf of the Northern California chapter of IIBEC (formerly RCI), I would like to extend a warm welcome to our organization. We are thrilled to have you onboard and looking forward to introducing you to our vibrant community of professionals dedicated to building enclosure consulting, design, and construction.

Our Chapter was chartered in 2018, and we host regular meetings and events throughout the year. We offer informative presentations, panel discussions, and educational seminars, which provide our members with a wealth of knowledge in the industry. These events also serve to foster networking opportunities for our members to connect and collaborate with each other.

As a member of IIBEC, you will have access to many resources, including our online library of technical articles, conference proceedings, and a variety of publications. You will also have the opportunity to participate in industry-related initiatives and events that promote and uphold the highest standards of building enclosure design and construction.

I would like to take this opportunity to introduce myself as the Chapter President. Our Board of Directors is composed of a dedicated team of professionals who volunteer their time to ensure that our chapter fulfills its objectives of promoting excellence in the industry, advancing the dissemination of knowledge, and facilitating communication and networking among its members.

We are confident that you will find our chapter to be a valuable resource in your careers and a rewarding experience. We encourage you to attend our upcoming events and to get involved in any way you can. We welcome your suggestions, feedback, and input to help us serve our members better.

Once again, welcome to IIBEC's Northern California Chapter. We look forward to meeting you soon and getting to know you better.

Sincerely,

Jerome L. Jeffers, II, RBEC, CCS, CCCA
President, Northern California Chapter of IIBEC

Chapter 1. Chapter Overview

1.1 Mission Statement

The mission of IIBEC Northern California Chapter is to advance the profession and education of building enclosure consultants at the local level and to advance of the objectives of IIBEC - to promote closer relations and cooperation between building enclosure professionals, contractors, manufacturers and trade associations which are engaged in, or directly connected with, the building construction industry.

1.2 Core Values

The International Institute of Building Enclosure Consultants is an international association of professional consultants, architects, and engineers who specialize in the specification and design of roofing, waterproofing, and building enclosure systems.

Since 1983 IIBEC members have offered unbiased design, repair planning, quality observance, legal testimony, and general roof management services.

The Northern California Chapter chartered in 2018 with the purpose to provide a medium at the local level for the advancement of the objectives of IIBEC – to promote closer relations and cooperation among the professionals, contractors, manufacturers, trade associations and societies which are engaged in or directly connected with, the building construction industry.
